

Supporting Advanced Education Grants

In recognition that those who serve in the education of our country bear a special burden in providing top quality instruction for their children because of employments in a variety of settings as careers are pursued and advanced degrees earned, the Board of Trustees has established a **Supporting Advanced Education Grant** program. The SAE Grant is intended to make the premier education available in the Lakeway Region accessible to families whose lives are dedicated to educating the next generation of leaders and scholars, keeping our values strong and our sense of community and responsibility keen and clear. The education of the children of such families should not suffer simply because of the luck of employment as defined by the great variation in the quality of local schools. Great service to higher education deserves an opportunity for great education for the professor's children.

SAE Grants are available for new students in families of active instructional personnel at Walters State Community College. Awards represent a **25% reduction in tuition** for each student; additional resources are available through our Indexed Tuition Program. Like our other tuition assistance programs, students must be developmentally and academically ready for the rigors of an All Saints' Episcopal School education. SAE Grants are renewable as long as the student's parent is employed in higher education in the Lakeway area.

Contact our Admissions Office for more information or to schedule a tour at 423-586-3280 or admissions@allsaintsepiscopalschool.org.
