

EarQ Family Hearing Plan

Importance of a Hearing Plan

The EarQ Family Hearing Plan offers an opportunity for people to enhance their lives through better hearing. According to the American Academy of Audiology, people with untreated hearing loss experience a decreased quality of life, as it has been shown to cause:

- depression
- poor relationships
- anxiety
- confusion
- paranoia
- social withdrawal

Also, people with untreated hearing loss may have a difficult time in their careers – often earning thousands of dollars less than their hearing peers. However, once treated and using hearing aids, those with hearing loss cut that wage difference by half.

With the EarQ Family Hearing Plan, participants have the ability to combat years of noise exposure and return to a natural quality of hearing and improved life at home and in the workplace.

The Benefit to Your Organization

The EarQ benefit is a value-added program that can be offered with your current benefit package, outside of insurance coverage. At **NO COST** to you, your participants and their family receive the following benefits:
