Classes for 2019

(Alphabetical Order)

Note: All classes are offered June 17 – 20 and June 24 – 27

NO FLIP FLOPS OR SANDALS ALLOWED IN ANY CLASS

3-D, Nature, Cartoon and Animation Drawing

GR 3–5, 6–8

This course will be chock-full of fun. Students will have the opportunity to express themselves through 3-D drawing using one and two dimensional techniques while incorporating shading and shadows and the breakdown the face. The fun doesn't stop there how about some cartoon and animation drawing like the animators of Disney. Students will study the art of stop animation, animal images and fantasy drawing. And last but not least, students will also try their drawing hands at plants, people and animals.

Blast Off

GR 3–5, 6–8

Emphasis in this class will be placed on using laboratory equipment to perform basic physics experiments. Subjects included will be mechanics, electricity and magnetism, optics (including lasers and telescopes) and sound. The physics of rocket flight will be discussed and model rockets will be launched as part of the experiments.

Bot-Ball Wars

GR 3–5, 6–8

An introduction to the world of robotics, with hands on activities using compressed air, hydraulics, and electric motors. Also includes a robotics competition to test the students' teamwork and robot manipulations skills.

Coding and Internet of Everything

GR 3–5, 6–8

Electrical engineering, automation, robotics, electronics, computer programming o' my. This class will take a modern hands-on look at all of these topics through the advancements of Arduino and Raspberry Pi. Arduino is hardware and software that can interact with buttons, LEDs, motors, speakers, GPS units, cameras, the internet, and even your smart-phone or your TV. It is the perfect platform to create your own devices and prototypes.

Film Makers

GR 3–5, 6–8

Are you the next producer of Harry Potter, Twilight Saga or a Disney movie? If so, this course will cover the basics of making a film. Using Microsoft Movie Maker, students will learn how to blend still photos, clips, music and audio together to make great home videos. Students will gather images from the internet. In addition, learn how to add titles, text overlays, special effects and credits to transform their summer production into a blockbuster. Student movies will be ready to show off to family and friends. Students are encouraged to bring their own photos on a CD or jump drive.

Forensic Files

GR 3–5, 6–8

Forensic science (often shortened to forensics) is the application of a broad spectrum of sciences to answer questions of interest to the legal system. This may be in relation to a crime or to a civil action. Students will learn how to use a broad range of scientific principles to solve a crime or legal scenario.

Jaws!! Shark Attack!!

GR 6–8

Shark Attack (Marine Biology) is the study of living organisms in the ocean or other marine or brackish bodies of water. Students will learn from an area expert about how marine biology differs from marine ecology and families and genera have some species that live in the sea and others that live one land. Students will be dissecting shark specimens.

Pottery

GR 3-5, 6-8

Join us for an adventure with clay. This class encourages participants to develop their creative ability and to express themselves artistically. Please bring an apron or over shirt to protect your clothing from staining and bring snacks. Also bring a box to bring home your fabulous treasures at the end of the week.

Spy Kids

GR 3–5, 6–8

Students will study and practice some of the basic skills and fundamentals in collecting evidence, as it would relate to a crime scene in the role of detective, forensic scientist and lawyer. Excitement builds as students examine clues, make a case and bring it to trial. This is an excellent course to relate how essential science and math are to the study of forensic science.

The Atoms Family — See How They React!

GR 3–5, 6–8

Chemistry has always been a popular science. Under the careful supervision of the chemistry instructor, students learn the fundamentals of chemistry and laboratory safety. Students will perform a number of exciting experiments in the laboratory and will have the opportunity to learn about chemistry hands-on. Students will see several spectacular chemical demonstrations.

The Pit

GR 6–8

Have you ever thought about what it takes to maintain a car? What should you do when red and/or blue dashboard indicator light flashes? What about safety measures that should be taken when changing a tire. Do you know how to change a tire? Stop by the pit and take a look at some of the first steps needed to achieve excellence in the field of automotive technology.

WaterWorld

GR 3–5

We will be studying water in WaterWorld. We will focus on freshwater and the types of fishes that live there. We will also be examining some types of water for microscopic life that calls it home. We will study the importance of water.

Web Design/Google Apps

GR 3–5, 6–8

In this class we will teach you how to make your very own web page to share your creations with your friends and the world! Students will learn the basic web design techniques and language such as HTML and the use of CSS. In addition, students will plunge into the world of Apps by using blocks-based coding programs. Participants will cover; what should and should not be shared, copyright rules and regulations, and overall web safety.

Registration Deadline - June 10, 2019

Classes may fill prior to the deadline date and if so, we may have to refuse applications prior to deadline.
